We ended up putting 8 fish in the net for our two fishermen today. There is quite a lot of fish on the Snake River at the moment and fishing is good. We did very well today with drifting eggs, wire and egg combinations. The water was low today so we fished for very light lead and really pounded slow pocket water near the bank. The water temperature was about 37, which puts these fish in slow water near the bank. We have open boats next week and we will be fishing for snake until 15 February 2019, so if you are interested in booking a day, please contact us. January 30, 2018 We continue to see great fishing at the lower end of Hell's Canyon on the Snake River near Heller Bar. It's been great to see all the keepers as well. Yesterday was awesome, nice Steelhead, no crowds and 58 degrees in January! We have a few openings in the next few weeks if you want to get out! Click here for more information about our Snake River Steelhead adventures. Snake Steelhead Snake River Steelhead January 26, 2018 We had another great day fishing Snake River out of heller bar. We finished our day 9-11 and kept 5 nice fish. Snake for Steelhead fishing is still a great option and we really think it will fish well into February! Even today, the key was fishing for a mixture of stiff shrimp. This mix just kicks fish out! We've got openings over the next few weeks, so come along with this when getting it is good! And did I mention that the river was ourselves?! Snake River Steelhead Snake River Steelhead Snake River Steelhead January 16, 2018 We had another fantastic day at the entrance to Hells Canyon from Heller Bar. We're still in a good way at Steelhead and we've found a lot of keepers. The success came today with drifting shrimp put in our little mix. It's been a great trick for us. Stay tuned as we continue to develop a specific recipe for the snake river! We might even share it with our readers. We have an opening next week, so contact Dan in our office 208-669-1569 or click Here to book online. January 14, 2018 Look at these beautiful Snake River Steelhead. Fishing is great right now from the Heller Bar at the entrance to Hell's Canyon. These fish are in good condition and the scenery is hard to beat. We have a date open this week and next to get in on the action. Snake River Steelhead January 13, 2018 Snake River Steelhead Snake River Steelhead Snake River Steelhead We had a fantastic day today on snake river at the entrance to Hell's Canyon from a tough fight against Steelhead. Nothing beats Steelhead fishing in January when the temperature is almost 50 degrees! We landed today and lost even more. We did very well drifting both the nastas and the prawns. With the large number of fish around the Heller Bar area, we expect fishing to be good until February. We have an opening in the next few weeks, so call Dan at our office 208-669-1569 and book your trip. On November 7, 2017 Over the weekend, we spent some time fishing in the Heller Bar area of the Snake River, and despite the low return rates and negative Steelhead press, we did very well. On Saturday I had two customers hooked over 12 Steelhead and Land 6. That's a great number when we talk about steelhead fishing. These are fine fish that fight hard and have good meat quality. We have a lot of open dates until the end of November, so if you're interested, please contact us and we can get you to set a great Steelhead fishing day! On October 18, 2016, we had a great steelhead fishing day today in Hells Canyon. We fished in the Heller Bar area. Today was a mixture of frustration and joy as the river changed from decently fished to quite vomit brown by lunch in the morning, but by 1pm we found a small amount of water to fish and that's when things got interesting, before we only had one little Chinook and one wild Steelhead on the boat, but in the two hours 1-3 we attached a total of 10 steelheads landed on 6 and held 4. Today was one of those days when there was determination in the waters and perseverance paid off. We notice some very subtle changes in river conditions and took advantage of the opportunity to put fish on the boat. I think later this week and next week looks good for the Snake River in the Heller Bar area, because these storms and high water should bring a bunch of fresh fish to the area. We have an opening from Monday to Friday next week and fishing is going to be fantastic! Fishing continues to be very good until November and December. If you would like to book your next trip with us, visit the Book Online Now button on our home page or visit the Snake River Steelhead section of our site for more information. Snake River Steelhead Snake River Steelhead October 16, 2016 We had another fantastic day fishing the Snake River out of heller bar for both Fall Chinook Salmon and Steelhead yesterday. Between salmon and Steelhead, we landed more than 10 adult fish and numerous Chinook tanks, and ended up keeping 4 fish (two Chinooks and 2 Steelheads.) All our fish were caught with eggs and yarns drifting from the side. Our best producing eggs have been the Jones Sport Fishing Steelhead Cure in Natural and Orange and salmon cure in Red. One thing we have noticed this season is that while the total number of steelheads may be lower than the average size of the fish we caught this season, it has been much larger. Usually most of the fish we catch on the Snake River are in the £4-£6 category, but this year we see a lot of fish in the £8-£10 range. We have an opening in the next few weeks. If you've been thinking about the Snake River Steelhead trip now, it's the perfect time to get into the water. Check out the Book Online Now button on our home page to view available dates and book your trip. Snake River Steelhead Snake River Fall Chinook October 10, 2016 With a big forecast, the Clearwater River in Idaho is this year we thought this would be a good time to share a video we made a few years ago. At Clearwater, we work as employees of Reel Time

Fishing. This is a great river with a huge Steelhead! There are gaps in Reel Time Fishing's team! Contact us and let your trip be complete. Starting in August and for the next 9 months, fishermen will be able to fish for the steelhead of an adult incubator in the rivers of Idaho. Fishing is best in the lower parts of the Clearwater, Snake and Salmon rivers in autumn. As Steelhead continues to move upstream, fishermen will find them in the South Fork Clearwater, Little Salmon and Upper Salmon rivers. Steelhead is sometimes accessed in other waters, such as the Boise River, to provide additional fishing opportunities. Steelhead's basic fishing gear spring steelhead on the Salmon River
